## EagleWatch Network DVR

The Price on this Top Notch Technology is Comparable to Those DVR's that Skimped on the Quality.

**We keep our cost low by building our DVR's to order. We keep our overhead low and can custom build your DVR. Please allow two weeks to process your order.**

**Demo units are in stock for emergency replacement only.**

Units needing repairs or upgrades can be fixed on-site or shipped overnight for an exchange while under warranty.

There is a **three year warranty** on all models of the EagleWatch Network DVR and there is **free training and technical support!**

We have made this DVR as simple to operate as possible, yet be capable of performing needed tasks as quickly as possible. Many safeguards are automatic and built-in to assure you have all the features needed to record, store and retrieve your camera images quickly and dependably.

# *Your Complete Security Company*

We call ourselves "Your Complete Security Company" because we offer a wide range of services to meet all of Your security needs.

## **SERVICES OFFERED:**

- Custom Alarm Systems
- Alarm Monitoring
- Access Control Systems
- Custom CCTV Systems
- Video Monitoring

*\*Continual Monitoring*

*\*Alarm Verification*

- Guards (in conjunction with  
*J. Pickett Ent./Delta Rangers*)

*\*Patrol*

*\*On-Site*

*\*Alarm Verification*

## **Custom Alarm Systems**

We can install an alarm system to meet your needs. Our systems can handle up to 999 users and 128 zones on one panel! Our trained sales people can tell you how to completely cover your property using today's most advanced security equipment.

## **Alarm Monitoring**

You have two options with alarm monitoring: with or without Open/Close Reports. With Open/Close reports, you can tell which user armed/disarmed your system, and at what time, each day. You will also have a log of all alarms and troubles your panel sent. This is a popular option with our commercial customers.

## **Access Control Systems**

These units are quickly becoming the new time clock/employee manager. As each employee enters your building, you will have a log that lets you know the exact time. They will use a keyfob or ID card instead of a traditional key. Another "plus" that our customers like is that you can set schedules/holidays. You can assign specific times/days for each keyfob holder. They will only be able to enter the building during those assigned periods. These units can be intergraded with our alarm system - which means less equipment for you to buy and manage.

## **Custom CCTV Systems**

These are our most requested systems. We use high quality cameras. Our cameras are small and won't "junk" up the look of your property. We have a wide range of cameras: day/night, infrared, covert, tag enhancing, and outdoor cameras are a few examples. Our trained sales team can help you decide which cameras will meet your needs best. Our most popular way to record images from your cameras is our customized **EagleWatch Network High Security Digital Video Recorders**. Our customers rave about how user friendly these units are! They are high quality, low maintenance, computer-like machines set at a competitive price! (For more information on our DVR, see DVR literature or go to our web site)

## **Video Monitoring**

**Delta Surveillance** has the ONLY video Central Station in the Memphis Area with guard response! As of July 2007, we are the only company that is licensed to watch your CCTV system locally.

We offer a couple different options for video monitoring.

\*Continual Monitoring: We can watch your cameras from our central station during the hours you request. If we see something happening we can: call the police, notify your on-site guard, have your patrol officer go by there, or notify you.

\*Alarm Verification: With this option, we will look at your cameras when we get an alarm. This option is more cost effective for small business and it saves on false alarms.

## **Guards**

Delta Surveillance works closely with J. Pickett Enterprises and the Delta Rangers. These guards are experienced with our security systems. They offer several services as well.

\*Patrol: With this option, a guard will drive by your property a specified number of times per night.

\*On-site- The on-site guards are much more effective when they have the camera system as a backup. One guard can only see what is in front of them. With camera back-up, they can see the whole property, inside and out, through any kind of weather. With our Central Station's help, the guard can be at the right place at the right time.

\*Alarm Verification: The patrol guard can go by the property when notified by our Central Station of an alarm or other unauthorized event happening at your property as seen by the cameras. Guards can be expensive. With alarm verification, you pay for the guard service as needed, not by the hour.
